# PVC Film

PVC Film are the soft and flexible thermoplastic sheets that are highly elastic in nature which excellent water, heat and moisture resistant properties that make them one of the best solutions for the protection of various types of materials. These can be used in architectural, construction packaging applications. PVC Film availed by us are printable which makes it very easier to print various elegant design patterns with the help of conventional screen and offset printing methods. The offered range of thermoplastic sheets can also be used for the manufacturing of shower curtains, table covers, food packaging, tank linings, raincoats and water proofing shields

## PVC Clear Film

## PVC Color Film

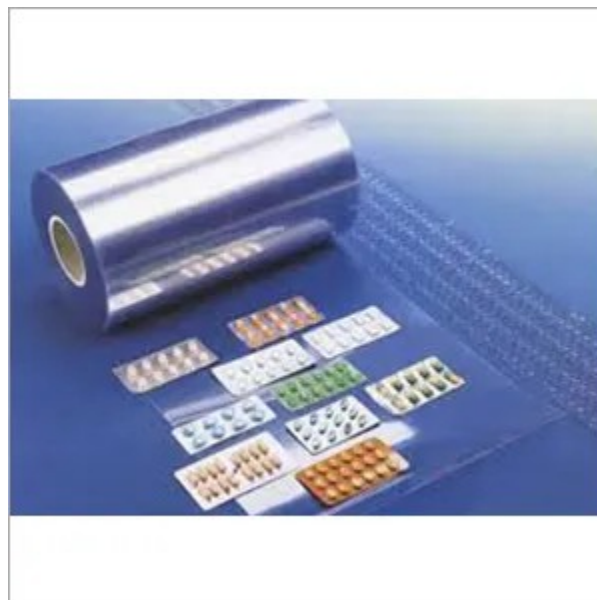

## **PVDC Film**

PVDC Film are highly flexible and clear synthetic thermoplastic sheets that are produced by the polymerization of vinylidene chloride. They are optically clear with a larger degree of gloss and has excellent resistant against oxygen and moisture as compared to the metallized films. These are widely used for the wrapping and packaging of various types of products which includes household items, food, medicines and pharmaceutical applications to increase the shelf life of the products. PVDC Film offered by our company are available in transparent and coloured finishes in various different sizes as per the length and the diameters of the rolls.
